

Datasette: Madly accessible data

@catherine.devlin@tech.lgbt

SQLite

Database

Data file format + C library

Access with

CLIs like sqlite3 or

```
> uvx litecli shakespeare.db
```

```
shakespeare.db> SELECT plain_text FROM paragraph LIMIT 5;
```

Browser extensions

Python access

```
import sqlite3
```

```
with sqlite3.connect('shakespeare.db') as con:
    curs = con.cursor()
    curs.execute('SELECT title, year FROM work')
    print(curs.fetchall())
```

```
[('Twelfth Night', 1599), ('All's Well That Ends Well', 1602), ('Antony and Cleopatra', 1606)]
```

Datsette

Made famous by [civicband](#)!

```
> uvx datasette shakespeare.db
```

Filter, query, export, publish, ...
